**GENERAL INFORMATION**

EvoFactor® is an adjuvant formulated to be used with nutrient solutions delivered as part of a regular feeding and irrigation schedule. It is designed for use in greenhouse, hydroponic and nursery environments. EvoFactor® is most effective when added last to the nutrient solution prior to application and use. EvoFactor® contains OpusMAX™, a proprietary aqueous based inert formulant.

**STORAGE AND DISPOSAL**

**Storage:** Store in a well-ventilated place. Keep Cool. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals.

Do not contaminate water supplies. For optimal storage, do not allow to freeze. Store between 35°-120° F.

**Disposal:** Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all federal, state, and local regulations.

**DIRECTIONS FOR USE**

Shake well prior to use.

EvoFactor® is compatible in most liquid nutrient solutions and should be added last to the finished nutrient solution at the suggested rates. When there is a question of compatibility prior to application, use the "jar compatibility test" in the following manner: Add 32 oz of the carrier you plan to use (water or liquid fertilizer). If water is your carrier, be sure to use the same water source that will go into the application tank. Add the materials you plan to use to the carrier in the following order: water soluble pouches, wettable powders, dry flowables, capsule suspensions, emulsifiable concentrates, soluble liquids, soluble powders, surfactants, and then lastly EvoFactor®. Seal the jar with the lid and shake vigorously after each addition. You will almost never use all these types of products at one time, so choose the ones you will use and add them to the jar in that order. Shake well and allow to stand for at least five minutes. Observe to determine if any flocculation, precipitation, or unusual settling out occurs. If flocculation, precipitation, or other incompatible properties, etc. occur, do not tank-mix EvoFactor® with that product. Select another product with suitable compatibility properties.

Mix thoroughly prior to application.

NOTE: Consult nutrient manufacturer labels for recommendation of their product(s).

**RECOMMENDED RATES FOR FERTILIZER INJECTION SYSTEMS**

See application chart below

**APPLICATION METHOD**

- Add EVOFACTOR last directly into your concentrated stock tank mix.
- While not required, for optimal results, agitation is recommended.
- Allow to sit for 15 minutes prior to use.

**RECOMMENDED RATE**

- Use 3.5oz of EVOFACTOR for every 1lb of actual Nitrogen in your fertilizer.
- Refer to the Rate Chart to calculate the amount of EVOFACTOR per 25lb bag of water-soluble fertilizer.
